

CPS PROTECTIVE BARRIERS

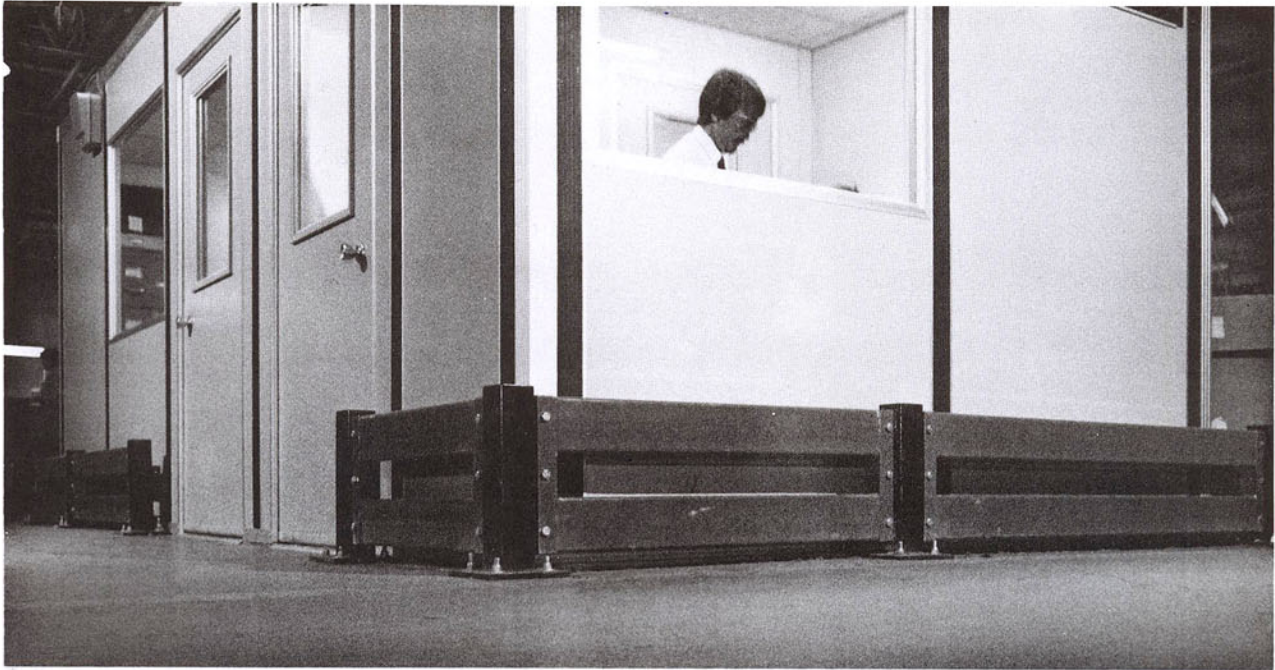

Photo illustrates barrier protecting a 9' x 22' CPS ModTech plant office.

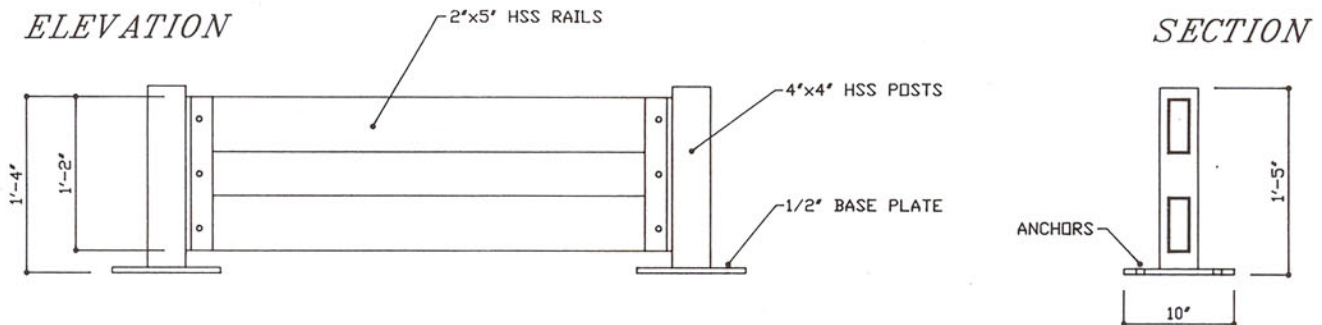

A SOLID INVESTMENT IN PROTECTION FOR PEOPLE, PRODUCTS AND FACILITIES

CPS Protective Barriers provide a physical and visual barrier between fork lift trucks and your personnel, product and facilities.

Modular in design, the steel rails are

easily assembled into a strong barrier to absorb the accidental impact exerted by mobile equipment. The rails are pre-fabricated 5" x 2" hollow structural section steel, the 4" x 4" columns have heavy steel base plates.

The system can be installed by CPS or by the customer and comes complete with all nuts, bolts, washers, anchors.
